Trans. of Jena U. Wissenschaftliche Zeitschrift.
Mathematisch-Naturwissenschaftliche Reihe (East
Germany) 1957/58, v. 7, no. 2/3, p. 273-277.

Ice lens formation and growth, water displacement
and ground heaving come about as different aspects of
a single event. The mechanical work performed during
this event is done substantially by the boundary-
surface forces of the two boundary surfaces, that be-
tween the ice and the water film and that between the
water film and the soil particles. (Author)
